

PROJECT PROFILE

Citigold Plant Relocation

Client: Citigold Corporation
Country: Queensland, Australia
Scope: CIL Plant Relocation
Project Value: \$6.5
Project Duration: 6 months
Year Awarded: 1996
Status: Completed

Project Description:

Calder Projects Services Director and Senior Project Manager, Jim Calder was appointed Project Manager for Resource Engineers on an EPCM project to dismantle, relocate, reconstruct and recommission a 250,000 tpa gold CIL process plant from Mt Hogan west of Cairns to Blackjack site outside Charters Towers.

Works also included design and construction of a new tailings dam, construction of 7 kilometres water supply pipeline and design and construction of a 66 kV substation to provide power to the plant.

The plant was successfully restarted and is still operational as at March 2010.
